

**If the Crude Oil Export Ban Is Lifted in 2015:
22,481 Supply Chain Jobs Created by 2018
In the State of Florida**

State and U.S Jobs and Growth by 2018 with the Export Ban Lifted		
	Jobs	Annual GDP Growth
State of Florida	22,481	\$3.0 billion
Total U.S.	440,000	\$64 billion

Lifting the ban on U.S. crude oil exports this year would create **22,481 new supply chain jobs** in the State of Florida by 2018. Additional 2018 Florida state and local tax revenues generated by crude oil exports from the state’s supply chain businesses and workers will amount to \$20 million.

Supply chain companies and workers produce and supply construction, equipment, materials, technology, logistics and services to some aspect of crude oil and natural gas operations. They are not oil and gas producers. Supply chain companies are predominantly small, and the jobs are primarily in the skilled trades, such as equipment operators and mechanics, factory workers, construction workers, welders, truck drivers, and process technicians. The jobs and businesses exist in all fifty states, not only in energy producing areas. For example, engineering services provided by a Florida firm may be used to design a new well complex in Ohio or Oklahoma. While the energy supply chain is a very broad and diverse cross-section of Main Street American businesses and workers, all members share one thing in common: their jobs ultimately depend on energy production. Increased crude oil production for export will enhance their lives and the prosperity of their families and communities.

Here are the energy supply chain sectors operating in the State of Florida, and the number of jobs created in the state by 2018, if the export ban is lifted in 2015:

Construction and Well Services	265	35,301,459
Information Technology	2,320	334,057,911
Logistics	419	32,443,234
Machinery and Equipment	13,290	1,923,211,394
Materials	976	151,477,308
Professional, financial, and other services	5,211	541,371,170
Total	22,481	3,017,862,476

The diagram below depicts the six major supply chain sectors and the individual industries comprising each.
